

# Data Replication

## Protect, Access, and Analyze Data Seamlessly

### Unlock The Power Of Data Replication

Imagine having the ultimate peace of mind, knowing that you always have a secure, real-time copy of your BSS/OSS data, right within your network. With IDI's cutting-edge Data Replication technology, you gain instant access to a mirror image of your production environment. Every change you make is seamlessly captured and transmitted to the replica through a rock-solid, secure Internet connection. This isn't just backup; it's empowerment.

### Peace of Mind in Every Byte

With IDI's Data Replication you can be confident that your data is secure and readily available:

#### ► Fortified Security

Utilize VPN tunnel connections for ironclad data transmission, ensuring your sensitive information is safeguarded at all times.

#### ► Real-Time Resilience

Our technology offers real-time database replication, enabling you to maintain a constant, up-to-date database hosted on your premises.

#### ► Data Accessibility

Access virtually all customer data, including crucial information such as end-customer details, financial records, product catalogs, orders, inventory, security data, and invoices.

#### ► Analytical Freedom

Enjoy standard T-SQL database access, allowing you to effortlessly craft ad-hoc reports and conduct in-depth BI data analysis

### Ready To Explore The Possibilities With Data Replication? IDI Can Help You Build A Better Experience.

Contact your dedicated Account Manager to discover how you can seamlessly integrate our Data Replication service into your solution. You can also reach out to us at **888.924.4110** or visit **idibilling.com** for more information.
