

## **Maximize Your Revenue With IDI's Comprehensive Suite Of Financial Management Tools**

New products and services, endless tax code changes and shifting market trends present quite a challenge when managing your telecom business' finances. To make timely and informed decisions, you need ready access to data via an intuitive interface.

IDI Billing Solutions' suite of financial capabilities equip you with everything you need to manage your finances intelligently and maximize cash flow.

## Comprehensive Telecom Tax Software

Unlike other operations and billing systems, IDI's B/OSS includes telecom tax software as an integrated capability — without the need for a third-party tax database interface or associated fees. You'll benefit from:

- ▶ Monthly tax database releases for the most accurate and up-to-date tax information
- ▶ The ability to create user-defined taxes or customize existing taxes
- ▶ The flexibility to accurately tax a wide range of products and services
- ▶ Exportable reports for regulatory compliance

## Mitigate Risks With Real-Time Credit Analysis

Mitigate potential risks and make informed decisions by integrating fully automated credit checks into your ordering process.

- ▶ Define your own credit classification rules that govern the types, quantity and required deposits for products and services on an order
- ▶ Eliminate swivel-chair or after-the-fact credit checks
- ▶ Maintain a complete history of previous credit reports
- ▶ Control costs by defining what types of orders require credit checks

## Maximize Cash Flow By Streamlining Your Collections Process

Real-time insight into past-due accounts and the status of their collections ensures your accounts receivable team is always in the loop. IDI's powerful automation tools enable you to reduce work on our end and shorten the payment cycle on the customers' end.

## Keep The Bottom Line On Target With GAAP-Compliant Accounting

IDI provides the critical reports needed to monitor and evaluate financial status, satisfy month-end journal entry reporting and feed third-party accounting packages. Everything you need to manage your finances intelligently.

- ▶ Define the General Ledger Chart of Accounts and fiscal calendar
- ▶ Generate journal entries for Billing, Customer Care and Retail transactions
- ▶ Post and re-post journal entries as a scheduled process or on-demand
- ▶ Export General Ledger data for import into third-party accounting solutions
